Summary

B.Tech student at United University, Prayagraj, studying Artificial Intelligence, with a strong interest in solving real-world problems through logic-driven, efficient solutions. Focused on actively generating practical approaches rather than surface-level fixes, with a continual drive to expand technical knowledge through hands-on projects.

Education

United University, Prayagraj, UP — B.Tech, Computer Science & Engineering (Artificial Intelligence)
2024 – 2028

Technical Skills

Languages: Python, JavaScript, Java, C, SQL

Web Technologies: HTML, CSS, JavaScript, REST APIs, Webhooks

Libraries & Data: NumPy, Pandas, Matplotlib

Tools: Git, VS Code, Postman, Docker (basics)

Core Skills: Problem Solving, Logical Thinking, Data Structures & Algorithms, Debugging

Projects

AI Diagnosis System 2025

- Built an AI-powered symptom checker and preliminary diagnosis tool using Python and classification logic to suggest possible conditions based on user-reported symptoms.
- Integrated a REST API backend (Flask) with a clean HTML/CSS/JavaScript frontend for real-time diagnosis flow and structured result output.
- Applied NLP techniques for parsing free-text symptom descriptions and mapped outputs to medical categories with confidence scoring and disclaimer notices.
- Designed with data privacy in mind – no personal data stored; all processing handled session-locally.

News Aggregator Browser Extension 2025

- Developed a browser extension that pulls the same news story from multiple outlets, merges key points, and generates a unified AI-powered summary to reduce information overload.
- Used REST APIs and web-scraping techniques (JavaScript + Node.js) to collect articles in real time; integrated lightweight NLP for bias detection across sources.
- Added offline save functionality and a per-article Q&A chatbot directly within the browser extension popup.
- Built to help students, analysts, and developers cut tab-clutter and speed up research.

Achievements

- **Hackathon** — Secured a top-40 rank out of 160 competing teams, demonstrating strong problem-solving, teamwork, and rapid prototyping under time pressure.
- **50-Day Coding Challenge** — Completed a rigorous 50-day consecutive coding challenge, solving DSA and logic problems daily to strengthen algorithmic thinking and consistency.

Interests & Soft Skills

Critical Thinking, Analytical Problem Solving, Fast Learner, Attention to Detail, Team Collaboration, Curiosity-Driven Mindset
